DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Su (6,425,674).
4. Su discloses a surface illuminant comprising a light source, a light guide plate having opposed sides which is optically coupled to the light source for emitting (fig 1) light incident from said light source through one opposed side thereof and a reflection film which is disposed on the other opposed side of the light guide plate wherein a wave length converting material is applied on said reflective film (col. 2 lines 25-38); the reflective film comprises a light storage material (12), the light guide plate is made of a transparent material in which a light storage material is blended (abstract), the light storage film is formed on the surface of the light guide plate (abstract, col. 2 lines 25-38).

Allowable Subject Matter

5. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter: The prior art cited does not disclose the concentration of light storage material in the light source layer increasing from its one end adjacent to the light source to the other end.
